The Defense Supply Center Philadelphia's Heavy Equipment Procurement Program (HEPP) is designed to support the acquisition of "commercial-type" heavy equipment used by a variety of military and other federal government organizations. Fiscal year 2003 sales totaled over \$213 million.

The program features multi award commercial requirement contracts and long-term agreements with many major suppliers of heavy equipment in the United States to support most types of heavy equipment. This equipment is available with the full range of manufacturer options and acquisitions made through the program that are quick and simple.

While the majority of our procurements are for categories of material handling/construction equipment, firefighting and crash/rescue vehicles, DSCP also buys small unit showers, building machines, hazardous material storage buildings and a wide range of other environmental products. As a result of the "most favored customer" status we enjoy with many of our manufacturers and vendors, we are able to offer discounted prices, excellent delivery options and extended warranties on select equipment.

HEPP will accept a variety of ordering methods, including Military Interdepartmental Purchase Requests (MIPRs), standard milstrip requisitions and purchase orders. Terms for these acquisitions are favorable, generally with significant discounts compared to individual procurement actions. The administrative charge for HEPP is currently set at 1 percent. No other surcharge or fee is applied.

HEPP Benefits

- * quick response
- * reduced procurement costs
